RekordPOS | Quick guide

Put RekordPOS on your shop computer.

Find the Windows download, install it, and sign in with the account you already have.

RekordPOS for Windows is the full system in a desktop window. It does everything the website does, and receipts print without the print box and the cash drawer can open. It works on Windows 10 and Windows 11.

IN THIS GUIDE

1. **Open the download page**
   From the menu at the top right
2. **Choose RekordPOS for Windows**
   The recommended card
3. **Install it**
   Open the file you downloaded
4. **Sign in**
   Same email and password as the website

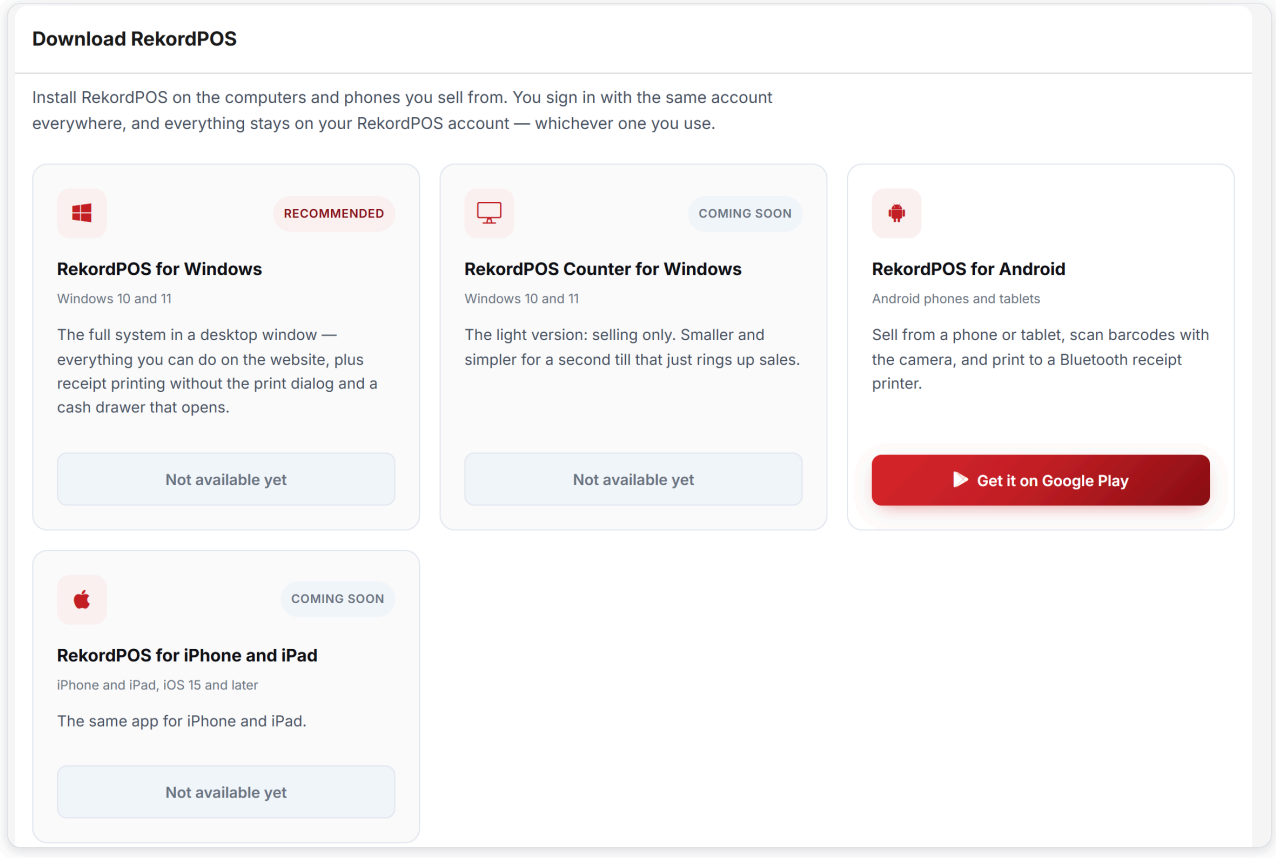
WHERE
Your name menu, Download RekordPOS

WORKS ON
Windows 10 and 11

COST
Part of your plan

1 Open the download page

Sign in to the RekordPOS website. Press your shop name at the top right and choose **Download RekordPOS**. The page lists every way to use RekordPOS: Windows, Android, and iPhone and iPad.



The Download RekordPOS page

2 Pick the right card

For your shop counter, choose **RekordPOS for Windows**. It carries the **Recommended** label. Press its download button. A second Windows card, the **Counter** version, is the light one for a second till that only sells.

> **Button says Not available yet?** That card has no installer ready for you. Ask Devcity support and we will tell you when it is ready. The website works in the meantime.

3 Install it

When the download finishes, open the file from your Downloads folder. If Windows asks whether to allow the app to make changes, choose **Yes**. Follow the steps on the screen until it finishes, then open RekordPOS from the Start menu or the desktop icon.

4 Sign in

Use the **same email and password** you use on the website. Everything is stored on your RekordPOS account, so the same products, customers and sales appear on every computer and phone you sign in on.

5 Other devices

The same page has **RekordPOS for Android**, with a Google Play button, and **RekordPOS for iPhone and iPad**. Use the same account on all of them.

6 Good habits

Install on the counter computer

Receipts print straight to the printer and the cash drawer opens, with no print box.

Keep one account

Sign in with the same email everywhere. Do not make a second account for a second computer.

Update when asked

If the app says an update is ready, install it at a quiet time, not during a rush.

Keep the website as a backup

If the computer fails, you can still sell from the website on any other computer.
